Work Experience

June 2024 - Apr 2025

BetaMind Inc. (Tokyo, Japan)

Full Stack Developer

- Milogos** (06/2024 - 04/2025): Built React components and responsive UIs from Figma. Integrated front-end with AWS Serverless back-end (CDK, Lambda, API Gateway, DynamoDB...). Developed and consumed RESTful APIs; performed code reviews.
- Spice - Smart Rirekisho** (10/2024 - 02/2025): Led a team to deliver an AI-driven resume platform. Created React components, ensured responsive design, and integrated OpenAI for UX enhancements. Managed tasks, conducted code reviews, and coordinated milestones.

Jul 2023 - Jul 2024

TTEK Inc. (Ho Chi Minh City, Vietnam)

Frontend Vue.js Developer

- RiskLab**: Developed reusable Vue.js/Vuetify components for a risk-management dashboard. Integrated Socket.io for real-time data updates, collaborated on UI/UX, and participated in architectural discussions.

June 2018 - June 2023

9thWonder Vietnam (Nha Trang, Vietnam)

Full Stack Developer

Watch me at 9thWonder Vietnam

- Mazi**: Built reusable Vue.js components, designed MongoDB schemas, and developed Hapi.js REST APIs. Wrote unit, component, and E2E tests (Jest, Cypress, Cucumber.js). Leveraged AWS (EC2, S3) and Elasticsearch.
- Email Validation Checker**: Designed UI/UX and built a TailwindCSS/JavaScript tool to automate HTML email validation for clients (Honda, Phillips 66).
- Cypress Template**: Created a customizable testing scaffold (Cypress, Cucumber.js) to standardize frontend automation.
- Bosley**: Wrote and maintained frontend test suites (Cypress).
- Encompass**: Built React/Gatsby components and GraphQL queries for Encompass static site.

- **XOS Simulator:** Developed a Vue 3 + TailwindCSS UI that mimics XOS machine interfaces.
- **WordPress Sites:** Delivered pixel-perfect themes and custom plugins (PHP, jQuery, GSAP, TailwindCSS) for clients like Syndeo Institute and Gravina Windows; improved performance and wrote PHPUnit/Cypress tests.
- **Hearsay & VIOC Oil Change:** Updated PHP/Drupal codebases, added automated tests, and optimized MySQL queries—achieved a 10× performance improvement on large data tables.
- **Honda Powersport:** Converted Figma designs into pixel-perfect modules with Nunjucks-based templating and animations.

○ 2019 - Present

Freelancer

Full Stack Developer

- **Shopee CRM & Analytics** (08/2021 – 04/2022): Designed database schemas (MongoDB), implemented Nest.js APIs, and built Vue.js dashboards to help Shopee sellers manage orders and customers.
- **DAO Management & DAO Chat** (03/2022 – 08/2022): Architected a secure employee/asset management system (Nest.js, MongoDB) and a chat app (Vue.js, Firebase) with group/single chat, media support, and Firebase Cloud Functions.
- **Hotato Chrome Extension** (04/2022 – 06/2022): Developed a Vue.js extension integrating Shopee APIs to surface historical sales data and sourcing suggestions.
- **Coffee House App** (08/2023 – 12/2023): Created Next.js + TailwindCSS frontend and Supabase/PostgreSQL backend to handle multi-branch coffee shop operations.
- **SnootySims** (02/2024 – Present): Designed and implemented a WordPress site (HTML, CSS, PHP) with custom search and personalization features; serves over 10,000 daily users.
- **Link and Cluster WP Plugin** (06/2024 – Present): Initiated and led development of a WordPress SEO plugin for analyzing and optimizing internal links. Acted as PM—gathered requirements, designed UI, and built core PHP features.
