

# THANG CAO

## Full Stack Developer

# +84368844581 | # cvthang56th2@gmail.com | # [linkedin.com/in/thang-cao96](https://www.linkedin.com/in/thang-cao96)

Full Stack Engineer with 8 years of experience building and shipping scalable web products across frontend, backend, cloud, and data. Works directly with overseas clients to clarify requirements, translate business needs into technical solutions, estimate scope, manage delivery, and ship production-ready applications end to end. Strong in TypeScript, React/Next.js, Vue, Node/NestJS, PostgreSQL, MongoDB, AWS, and AI/LLM integration, with a track record of serving 10K+ users, indexing 3M+ records, and improving performance by up to 10x.

## CORE SKILLS

**Frontend:** TypeScript, React, Next.js, Vue.js, Tailwind CSS, Vuetify

**Backend:** Node.js, NestJS, Go, PHP, REST APIs, Socket.io, WordPress, WordPress Plugin Development

**Data & Search:** PostgreSQL, MongoDB, Typesense

**Cloud & DevOps:** Docker, CI/CD, AWS, DigitalOcean, Supabase

**Engineering:** System Design, API Design, Performance Optimization, Automated Testing, Code Review, AI/LLM Integration

## PROFESSIONAL EXPERIENCE

**Full Stack Developer, Freelance & Independent Projects | Remote** Jul 2025 to Present

- Owned direct communication with overseas clients to gather requirements, clarify scope, propose solution options, and estimate delivery plans.
- Led end-to-end delivery across discovery, architecture, development, testing, deployment, monitoring, and post-launch support.
- Built full-stack solutions with React, Next.js, Node.js, NestJS, PostgreSQL, MongoDB, AWS, and WordPress, with a focus on maintainability and scalability.
- Managed tasks and resolved production issues across application, database, and infrastructure layers to keep releases stable and reliable.

**Full Stack Developer at BetaMind Inc, Tokyo, Japan | Remote** May 2024 to Jun 2025

- Built and shipped web features with React and Next.js, turning product requirements and designs into reusable UI and end-to-end functionality.
- Implemented AWS serverless APIs and supporting cloud services for production applications.
- Developed AI-powered features with OpenAI and Go, integrating them into user-facing workflows.
- Partnered with product, design, and engineering teammates on feature delivery, code reviews, and architecture decisions.

**Full Stack Developer at TTEK Inc., Ho Chi Minh City, Vietnam | Remote** Jul 2023 to May 2024

- Built reusable Vue.js and Vuetify components for risk-management, monitoring, and analytics platforms.
- Added real-time synchronization with Socket.io to improve visibility in time-sensitive workflows.
- Translated business requirements and UI designs into maintainable frontend features.
- Contributed to frontend architecture and shared component patterns across multiple applications.

Full Stack Developer at 9thWonder Agency, Nha Trang, Vietnam | Onsite Jun 2018 to Jun 2023

- Delivered and maintained 10+ web products for US and Vietnamese clients, including marketing sites, dashboards, internal tools, browser extensions, and CMS-based solutions.
- Built across React, Vue.js, Node.js, PHP, and WordPress, covering UI work, APIs, database design, testing, deployment, and production support.
- Improved query performance on large datasets, cutting response times 10x faster, from 2s to 200ms in some cases.
- Took ownership of feature delivery and troubleshooting across frontend and backend.
- Worked closely with designers, developers, and stakeholders on multiple concurrent projects.

## SELECTED PROJECTS

---

wcif.cc — Search & Data Platform | Independent Project 2025 – Present

- Built and operate a high-traffic search platform serving 10K+ users and indexing 3M+ records for The Sims 4 custom content.
- Designed the data pipeline end to end, including scraping, ingestion, normalization, and sync workflows to keep search results current and reliable.
- Integrated Typesense with a Next.js + NestJS stack to deliver fast, relevant search across millions of records.
- Owned architecture, database design, deployment, monitoring, and production support to ensure stability and scalability.
- Improved discoverability and user experience through performance tuning, structured metadata, and search-focused product decisions.

Saypien — AI Survey Platform | Product Delivery 2025

- Built AI-powered survey generation and editing features with React and Next.js.
- Connected AI workflows to review and refinement screens so users could quickly improve generated surveys before publishing.
- Improved UI/UX, accessibility, and frontend performance while shipping product updates.

Spice — Smart Rirekisho | Product Delivery 2024

- Built features for an AI-powered resume platform using React and Next.js.
- Integrated OpenAI-powered workflows into the resume creation flow.
- Supported delivery through implementation, code reviews, and cross-functional coordination.

Internal Engineering Tools 2020 – 2023

- Suggested and built some internal tools that reduced repetitive development, testing, and deployment work.
- Created reusable testing templates and CI/CD pipelines to standardize project setup and delivery.
- Developed WordPress plugins and automation utilities that improved team efficiency.

## EDUCATION

---

Master of Science in Information Technology, Nha Trang University, Vietnam 2023

Bachelor of Science in Information Technology, Nha Trang University, Vietnam 2018

## CERTIFICATIONS

---

AWS Certified Solutions Architect - Associate 2025

Certified Vue Developer, VueAcademy 2023
