PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of experience building modern web applications with Next.js, React, Node.js, and cloud-based architectures. Experienced in delivering products for teams and clients across Vietnam, Japan, and international remote environments. Strong background in AI-powered applications, search and data-heavy systems, and end-to-end product development, with a focus on scalable user experiences, performance, and reliable delivery.

WORK EXPERIENCE

Saypien | Ho Chi Minh City, Vietnam | May 2025 - Sep 2025

- Full Stack Developer
- Built React and Next.js features for an AI-powered survey generation platform.
 - Integrated AI-driven workflows to generate survey content and improve product usability.
 - Contributed to UI/UX improvements, accessibility checks, and frontend performance optimization.
 - Collaborated on product architecture and end-to-end feature delivery in a cross-functional team.

BetaMind Inc. | Tokyo, Japan | Jun 2024 - Apr 2025

- Full Stack Developer
- Delivered web product features for international clients using React, Next.js, Supabase, AWS, and serverless APIs.
 - Built responsive UI from Figma designs and integrated frontend applications with Lambda-based backend services.
 - Contributed to code reviews, implementation quality, and delivery across multiple client-facing products.
 - Worked in a cross-border team environment serving digital products and AI-enabled web platforms.

TTEK Inc. | Ho Chi Minh City, Vietnam | Jul 2023 - Jul 2024

- Frontend Developer
- Developed reusable Vue.js and Vuetify components for risk-management dashboards.
 - Integrated real-time updates with Socket.io for data-intensive operational workflows.
 - Collaborated with design and engineering teams on dashboard usability and architecture decisions.
 - Delivered frontend features for enterprise-style monitoring and analytics products.

9thWonder Vietnam | Nha Trang, Vietnam | Jun 2018 - Jun 2023

Full Stack Developer

- Delivered 10+ production products for US and Vietnamese clients in a high-output digital agency environment.
- Worked across React, Vue.js, Node.js, PHP, and WordPress stacks to build and maintain client-facing products in production.
- Owned end-to-end delivery across frontend development, backend APIs, database design, testing, performance optimization, and release support.
- Built products across multiple formats, including marketing sites, dashboards, browser extensions, internal tools, and CMS-based platforms.
- Improved performance on large data workloads, including optimization work that delivered a 10x improvement in query speed.
- Supported fast parallel delivery across multiple accounts while maintaining code quality and implementation consistency.

Part-time Freelance & Independent projects | 2019 - Present

Full Stack Developer

- Built and shipped production web projects across content platforms, search systems, internal tools, and automation-focused applications.
- Worked across product design, frontend development, backend services, testing, and deployment depending on project scope.
- Combined hands-on engineering with product thinking, performance optimization, and practical delivery ownership.

SELECTED PROJECTS

wcif.cc

Independent Project 2025 - Present

- Designed and developed a search platform for The Sims 4 custom content from scratch.
- Built automated scraping and synchronization pipelines to collect and maintain large-scale content data.
- Indexed more than 3 million records and implemented fast search and discovery using Next.js, MongoDB, Typesense, Playwright, and AWS.

SnootySims

Independent Project 2024 - Present

- Built and customized a high-traffic content platform for The Sims 4 community.
- Implemented search and personalization features to improve content discovery and user experience.
- Supported a website serving more than 10,000 daily users, with a focus on maintainability and performance.

Spice - Smart

Rirekisho

Product Delivery 2024

- Contributed to the delivery of an AI-powered resume platform focused on resume creation workflows.
 - Built responsive React and Next.js interfaces and integrated OpenAI-powered features to improve the product experience.
 - Supported engineering delivery through code reviews, task coordination, and cross-functional collaboration.
-

CORE SKILLS

Frontend	Next.js, React, TypeScript, Vue.js, Tailwind CSS, Vuetify
Backend	Node.js, NestJS, Express.js, REST APIs, Supabase, PHP
AI & Data	OpenAI, Typesense, MongoDB, MySQL, data scraping, indexing pipelines
Cloud & Tools	AWS, Vercel, Playwright, Cypress, Jest, Git
Other	Performance optimization, accessibility, code reviews, cross-functional collaboration

EDUCATION

Nha Trang University
Major: Information Technology

Engineer's Degree | 2014 - 2018
Master's Degree | 2021 - 2023

CERTIFICATIONS

[AWS Certified Solutions Architect - Associate | 2025](#)
[Certified Vue Developer, VueAcademy_ | 2023](#)
